

HEALTH & SAFETY/ INDUSTRIAL HYGIENE

Building safety culture and
reducing injuries and illness

HEALTH & SAFETY/ INDUSTRIAL HYGIENE CAPABILITY STATEMENT

Broadbent's robust team of safety professionals understand how to develop a modern, sensible, and engaging health and safety program. Our programs serve as the foundation to build a culture where safety is embraced throughout an organization. We also assist with program roll-out, implementation, and interactive training. Our professionals include Certified Industrial Hygienists (CIH), Certified Safety Professionals (CSP), and OSHA/MSHA experts who specialize in assessing and managing occupational exposure to hazards to maintain a safe and healthy work environment.

Our team's approach reduces injuries and illness, lowers incident rates, and ultimately reduces insurance costs for our clients. We also maintain state and national certifications for services such as asbestos, lead, mold, and methamphetamine inspections and sampling; X-ray fluorescence (XRF) testing; SafeTraces veriDART® indoor air quality assessment; and many others which provide assurance to our clients that work is being conducted with technical quality and according to appropriate local requirements.

HEALTH & SAFETY SERVICES

- Facility inspections and audits
- Hazard identification and risk assessment
- Health and safety program development and evaluation
- On-site safety training
- OSHA/MSHA compliance assistance and representation

INDUSTRIAL HYGIENE SERVICES

- Exposure assessment, monitoring, and sampling (silica, metals, VOCs, dust, PM 2.5 & 10)
- Hazardous building material surveys (asbestos, lead based paint)
- Hazardous dust control and management plans
- Indoor air quality testing (mold, radon, carbon monoxide, VOCs)
- Lighting/illuminance surveys
- Noise surveys (hearing conservation, dosimetry)
- Nuisance odor assessment
- Project safety management
